

GUIDELINES FOR RANGE PHOTOGRAPHS

The purpose of the range photos is to provide MSF with a 360-degree view of the entire range (including the middle) and the 20' run-off area, including the overall surface condition. Since it is possible that your range design may not be accepted as submitted, it is strongly suggested that you DO NOT paint your range until it has been formally recognized by MSF.

Requirements:

- Digital photographs only
- Photos must be clear and sharp
- File size limits are 10 meg per email
- A minimum of 8 color photos is required
- Satellite and aerial photos are not acceptable as replacements for ground level photos

Instructions:

- 1.) Before taking photos, place a **visible** marker (i.e.: large traffic cones) at each corner of the range area.
- 2.) Take two photos from each corner: See the diagram below and attached pictures for reference.
 - **Photo 1: Long-side View:** Includes 3 corners of the range: the corner nearest the photographer and the two farthest corners (area within the red lines below).
 - **Photo 2: Short-side View:** Includes 2 corners: the corner nearest the photographer and the next closest corner (area within the blue dashed lines below).
 - **Tip:** Photographer should stand approximately 20 ft back from each corner.
- 3.) Use descriptive file names for your photos (e.g., C-longside.jpg).
- 4.) Include photographs of any surface conditions (e.g., drain or manhole cover) located on the range or in the run-off area.
- 5.) E-mail photos to rep@msf-usa.org and let MSF know by telephone or in a separate email that you have sent the photos. *Note: file size limits are 10 meg per email.*

Long side view - three markers visible

Short side view – two markers visible
